PARIOLA AYOMIKUN OLOLADE

FRONTEND ENGINEER | SOFTWARE ENGINEER

lopampariola@gmail.com | lopam.pario.la | github.com/loppam

PROFESSIONAL SUMMARY

Frontend-focused Software Engineer building React and TypeScript products across fintech, scheduling and event ticketing. Experienced in responsive interfaces, complex dashboard workflows, API integration, state management and supporting backend systems.

WORK EXPERIENCE

Lead Software Engineer | Noctix *Nov. 2025 – Present*

• Developed attendee, organizer and admin interfaces for an event-ticketing platform with 13,000+ tickets sold and 1,000+ registered users.

• Built React/TypeScript checkout, event management and analytics workflows with TanStack Query and Redux Toolkit; implemented offline check-in using IndexedDB.

• Integrated Nomba payment flows and typed API clients with a custom Fastify/PostgreSQL backend; Firebase remains for authentication and push notifications.

Key Tools: React, TypeScript, Tailwind CSS, TanStack Query, Redux Toolkit, IndexedDB, Fastify, PostgreSQL, Nomba.

Frontend Engineer | Buffer *Feb. 2026 – Sept. 2026*

• Built booking, scheduling and admin workflows as primary frontend engineer, working alongside a backend developer.

• Refined loading, empty, and error states across dashboard workflows, reducing UI-related support issues by a reported 25%.

• Developed 10+ reducer-driven hooks and a Turborepo workspace sharing UI and utilities across separately deployed applications.

Key Tools: React, TypeScript, Turborepo, Tailwind CSS, Git.

Frontend Developer | JexPay *Aug. 2025 – Feb. 2026*

• Developed marketing and admin applications in React/TypeScript, including transaction reviews, user/KYC management and treasury views.

• Integrated live crypto and gift-card estimates with public APIs, request debouncing and stale-response handling.

• Built shared typed API clients and response mappers in Turborepo, with reusable UI controls and permission-aware staff navigation.

Key Tools: React, TypeScript, React Router, Vite, Turborepo, Fetch API, Framer Motion, Recharts.

Frontend Engineer | Nomba Financial Services Ltd. *Sept. 2024 – Feb. 2025*

• Improved pagination, search and error handling, with a reported 20% reduction in user issues.

• Implemented BVN association and KYC rejection tracking, with a reported 30% reduction in verification errors.

• Worked with backend and QA engineers to resolve transaction-flow defects and improve billing interfaces.

Key Tools: React, TypeScript, JavaScript, REST APIs, Git, Linear.

Frontend Developer | Sneaklin Ltd. *Jan. 2022 - Mar. 2024*

• Contributed to an e-commerce platform generating $10K+ in revenue and handling 30+ daily orders.

• Implemented responsive React and Tailwind CSS storefront interfaces, improving mobile retention by 25%.

• Reduced page load time by 25% through frontend refactoring and performance optimization.

Key Tools: React, JavaScript, Tailwind CSS, CSS, Firebase, Git.

SIDE PROJECTS

Vampless | Solana Launchpad

• Built frontend interfaces for token launches and administration, including launch configuration and quote-token selection.

• Tested Meteora DBC integrations and qualified on-chain holder indexing using Yellowstone streams and Alchemy RPC.

COPE | On-chain Intelligence Platform

• Developed V1 wallet analysis workflows for transaction histories, trading activity and wallet performance.

• Designed V2 frontend workflows for presenting on-chain signals and AI-assisted research, alongside the data ingestion and analysis architecture.

EDUCATION

B.Sc. Computer Science | Kwara State University, Nigeria
2021–2025

Major Coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems

Activities: Google Developer Student Club (GDSC)

SKILLS AND TECHNOLOGIES

Frontend: React, TypeScript, JavaScript, Tailwind CSS, React Router, Vite, HTML/CSS, Figma implementation.

Application State: TanStack Query, Redux Toolkit, React Hooks, IndexedDB, PWA/Workbox, Capacitor.

APIs & Tools: REST APIs, Fastify, PostgreSQL, Redis, Firebase Auth/FCM, Nomba, Git, Docker, Turborepo.

AI-Assisted Development: Cursor, OpenAI Codex, Grok, Claude.

Soft skills: Creative Thinking, Problem Solving, Collaboration, Communication, Adaptability.
